

Michael Kahen

New York, NY | +1 (516) 303-3852 | michael@michaelkahen.com
github.com/michaelkahen | michaelkahen.com | linkedin.com/in/michaelkahen

Technical Skills

Programming: Python, C/C++, SQL, TypeScript, JavaScript | **Spoken:** English (native), Persian/Farsi (fluent)

Frameworks: Next.js, React, Node.js, Medusa, Streamlit, Flask, PyTorch, TensorFlow

Data: PostgreSQL, Redis, Meilisearch, MongoDB, Supabase, MinIO/S3, Pandas, NumPy

Infrastructure & Tools: Docker, AWS, DigitalOcean, Linux, Git, pnpm/Turborepo, Playwright, Jest, Vitest

Experience

Technology & Operations Manager

Lady Couture of NY

Mineola, NY

May 2023 – Present

- Architected and launched NinetyUnion.com from scratch, building an 8-workspace headless-commerce platform using Next.js, React, Medusa, PostgreSQL, Redis, Meilisearch, Stripe, Resend, and MinIO/S3.
- Built a resumable Squarespace ETL and reconciliation pipeline that normalized 9,445 variants into 260 styles and 1,122 colorways, yielding 0 discrepancies across PostgreSQL, Meilisearch, and storefront catalogs.
- Built a content-addressed AVIF/WebP/JPEG media pipeline and verified 24,620 objects (4.06 GB); enforced 1.1 MB total and 250 KB per-chunk JavaScript budgets, with the live build at 819 KB.
- Extended Medusa with 25 custom data models, 32 workflows, and 58 API routes; built an idempotent PostgreSQL outbox with Redis locks and a suite executing 334 automated tests, then deployed to a DigitalOcean Droplet running Ubuntu.
- Delivered a Python/Streamlit fulfillment system reconciling Pavo, OMS, and carrier data with QR/barcode validation, surfacing missing data before shipment and saving 1–2 hours per day.
- Automated inventory ETL for GoFlow, Rithum, and Faire, generating platform-ready uploads and reducing manual multichannel reconciliation.

Software Engineering Intern

UptickNYC

New York City, NY

May 2024 – May 2025

- Led development of Analytics and Taskboard pages for a Python/Reflex CRM, integrating React components, MongoDB data retrieval, external APIs, and authentication-platform research.
- Returned to prior client products to ship React/CSS features, resolve defects, improve UI/UX, and optimize data-retrieval workflows.

Information Technology Intern

Medical & Dental IT Solutions

New York City, NY

May 2024 – Aug 2024

- Installed and tested LAN infrastructure for medical and dental offices, including network racks, Cat6 terminations, patch panels, and 70-volt audio systems.
- Configured Windows servers and domain users; migrated workstation data with Robocopy to minimize client downtime.

Education

Stony Brook University

B.E. in Computer Engineering, GPA: 3.4

Stony Brook, NY

May 2025

Projects

RISC-V Pipeline Lab

JavaScript, RV32I, Computer Architecture

michaelkahen.com/#cpu

- Built an interactive five-stage RV32I pipeline simulator with a two-pass assembler, forwarding, stalls, flushes, branch prediction, cache timing, and CPI telemetry.
- Validated instruction execution with deterministic tests against an independent sequential reference model.
